

COMAPC Speakers Bureau

COMAPC members are available to speak to your group, business or organization about detection and treatment of prostate cancer. While not medical authorities, our speakers present the facts about prostate cancer, detection, screening and treatment options. We encourage all men to become their own health advocates.

Understanding Prostate Cancer

Overview

Many men are unaware of the signs and symptoms of prostate cancer. This presentation offers a primer on the disease including risk factors, diagnostic methods and treatment options.

Presentation Outline

- Prostate location and function
- Risk factors for developing prostate cancer
- Sign and symptoms
- Screening and detection
- Prostate cancer
- Prostate cancer grades and stages
- Treatment options
- Side effects of concern
- Summary
- Q & A
